Technical Skills

React, TypeScript, JavaScript, HTML, CSS, WordPress, AWS (EC2, RDS), Python, Flask, RESTful APIs, Firebase, PostgreSQL, Git/Version Control, Database Design, CI/CD, Unit Testing, Agile (Scrum)

Experience

Software Engineer Lead | PushFi

Remote

09/2025-present

- Lead technical development of Uber-style lending platform MVP targeting 30-day launch
- Architect React/Node.js/PostgreSQL stack with automated lender-matching engine and third-party KYC integrations
- Implement borrower onboarding wizard and agent dashboard supporting 50-50 revenue split model
- Drive daily stand-ups and maintain sprint velocity tracking 1,000 agent acquisition within 90 days
- Building borrower onboarding and agent dashboards to support \$50M first-year funding target

Software Engineer I | Helios Technologies

Remote

02/2025-09/2025

- Joined AI companion startup needing UI improvements and more efficient LLM implementation
- Modernize codebase and enhance user experience by implementing new features and responsive web designs
- Develop reusable components using TypeScript, React, and Vite, improving UI/UX and user engagement
- Successfully migrated environment configuration from client-side to server-side for easier application updates
- Collaborate with design and product teams to implement intuitive interfaces aligned with business goals
- Implement and maintain RESTful APIs for seamless front-end and back-end integration

Software Engineer Intern | CodeAlpha

Remote

09/2024 - 04/2025

- Built cross-platform mobile applications using React Native, focusing on component architecture and state management
- Developed understanding of mobile-first UI/UX patterns for user-facing applications
- Applied learnings to independently build HeadStrong, a mental health app designed with privacy first architecture for sensitive user data

Software Engineer Intern | Resonate

Remote

09/2023 - 12/2024

- Built full-stack chat system using React Native and PocketBase, cutting database queries by 40%
- Enhanced database performance by 30% through lifecycle management of data statuses
- Refactored TypeScript navigation architecture with enhanced type safety, reducing related bugs by 25%

Software Engineer Intern | OpenQQuantify

Remote

07/2023 - 02/2024

- Developed front-end components using JavaScript and modern frameworks
- Collaborate with cross-functional teams to implement and optimize quantum algorithms

Projects

HeadStrong | Mental Health App for Men

- Identified gap in mental health resources specifically tailored for men
- Create a cross-platform application focusing on men's mental wellness
- Built using React Native with Expo and TypeScript; implemented mood tracking, activity streaks, peer communities, and Firebase integration
- Delivered functional application addressing stigma around men's mental health with intuitive data visualization using React Native Chart Kit

AI-Powered Resume Chatbot | Personal Portfolio Enhancement

- Needed innovative way to present professional information to potential employers
- Develop interactive solution to showcase skills and experience
- Created chatbot using React, TypeScript, and OpenAI API; implemented @chatscope/chat-ui-kit-react for interface
- Enhanced portfolio interactivity, allowing seamless access to professional information with error handling and retry mechanisms

Education

Bachelors in Science | Computer Science | FIU | 2022

Interests

AI/ML | Security Engineering | Web Development | UI/UX Design | API Integration | Scalability Challenges | WordPress Development | Continuous Learning
